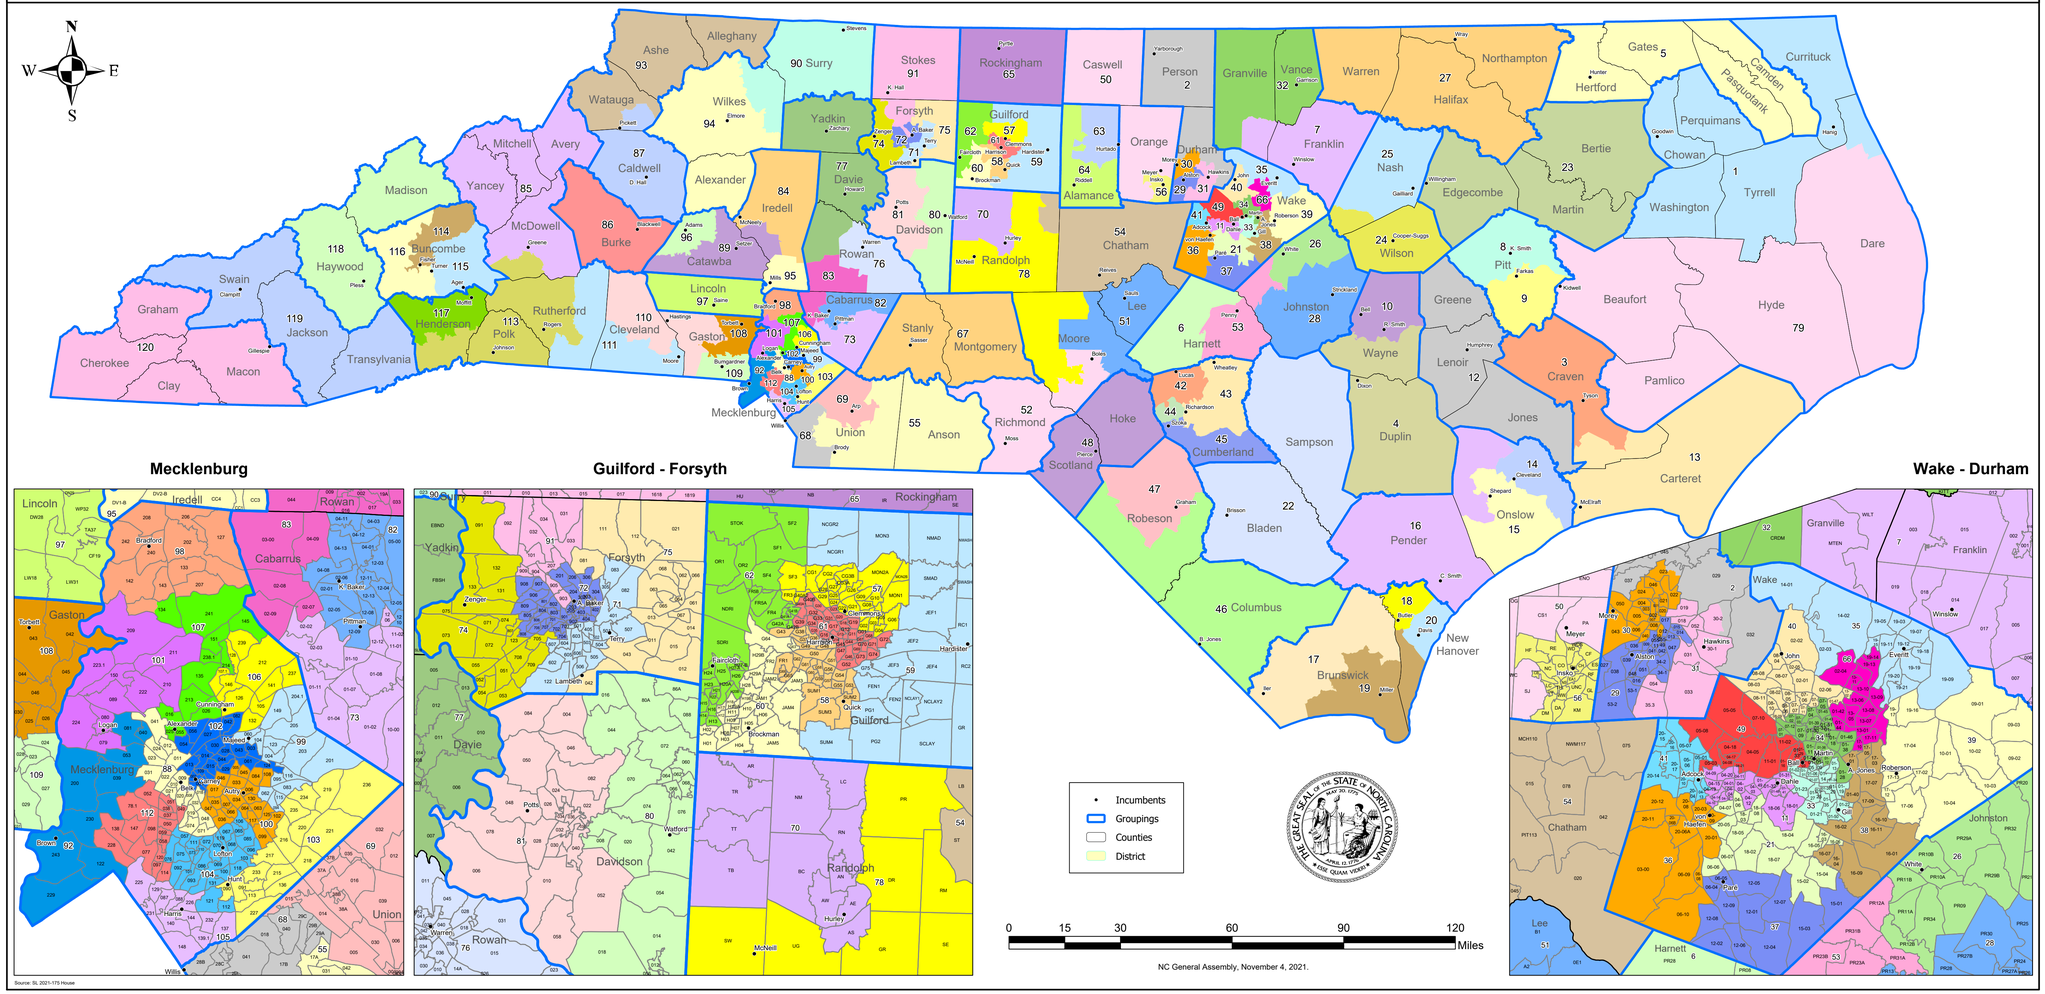
(b) The names and boundaries of voting tabulation districts and blocks specified in this section are as shown on the Census Redistricting Data P.L. 94-171 TIGER/Line Shapefiles associated with the most recent federal decennial census.

(c) If any voting tabulation district boundary is changed, that change shall not change the boundary of a House district, which shall remain the same as it is depicted by the Census Redistricting Data P.L. 94-171 TIGER/Line Shapefiles associated with the most recent federal decennial census."



SECTION 2. This act is effective when it becomes law and applies to elections held on or after January 1, 2022.

In the General Assembly read three times and ratified this the 4th day of November, 2021.

s/ Ralph Hise
Presiding Officer of the Senate

s/ Tim Moore
Speaker of the House of Representatives

Measures of Compactness Report

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.

GENERAL ASSEMBLY OF NORTH CAROLINA
SESSION 2021

SESSION LAW 2021-173
SENATE BILL 739

AN ACT TO REALIGN THE DISTRICTS OF THE NORTH CAROLINA STATE SENATE FOLLOWING THE RETURN OF THE 2020 FEDERAL DECENNIAL CENSUS.

The General Assembly of North Carolina enacts:

SECTION 1. G.S. 120-1(a), (b), and (c) are rewritten to read:

"(a) For the purpose of nominating and electing members of the Senate in 2022 and periodically thereafter, senatorial districts are established and seats in the Senate are apportioned among those districts so that each district elects one senator, and the composition of each district is as follows:

District 1: Bertie County, Camden County, Currituck County, Dare County, Gates County, Hertford County, Northampton County, Pasquotank County, Perquimans County, Tyrrell County.

District 2: Carteret County, Chowan County, Halifax County, Hyde County, Martin County, Pamlico County, Warren County, Washington County.

District 3: Beaufort County, Craven County, Lenoir County.

District 4: Greene County, Wayne County, Wilson County.

District 5: Edgecombe County, Pitt County.

District 6: Onslow County.

District 7: New Hanover County: VTD CF02, VTD CF05, VTD FP03, VTD FP04, VTD FP06, VTD FP07, VTD FP08, VTD H02, VTD H03, VTD H04, VTD H05, VTD H06, VTD H08, VTD H10, VTD H11, VTD H12, VTD H13, VTD M02, VTD M03, VTD M04, VTD M06, VTD M07, VTD W03, VTD W08, VTD W12, VTD W13, VTD W15, VTD W16, VTD W17, VTD W18, VTD W21, VTD W24, VTD W25, VTD W26, VTD W27, VTD W28, VTD W29, VTD W30, VTD W31, VTD WB.

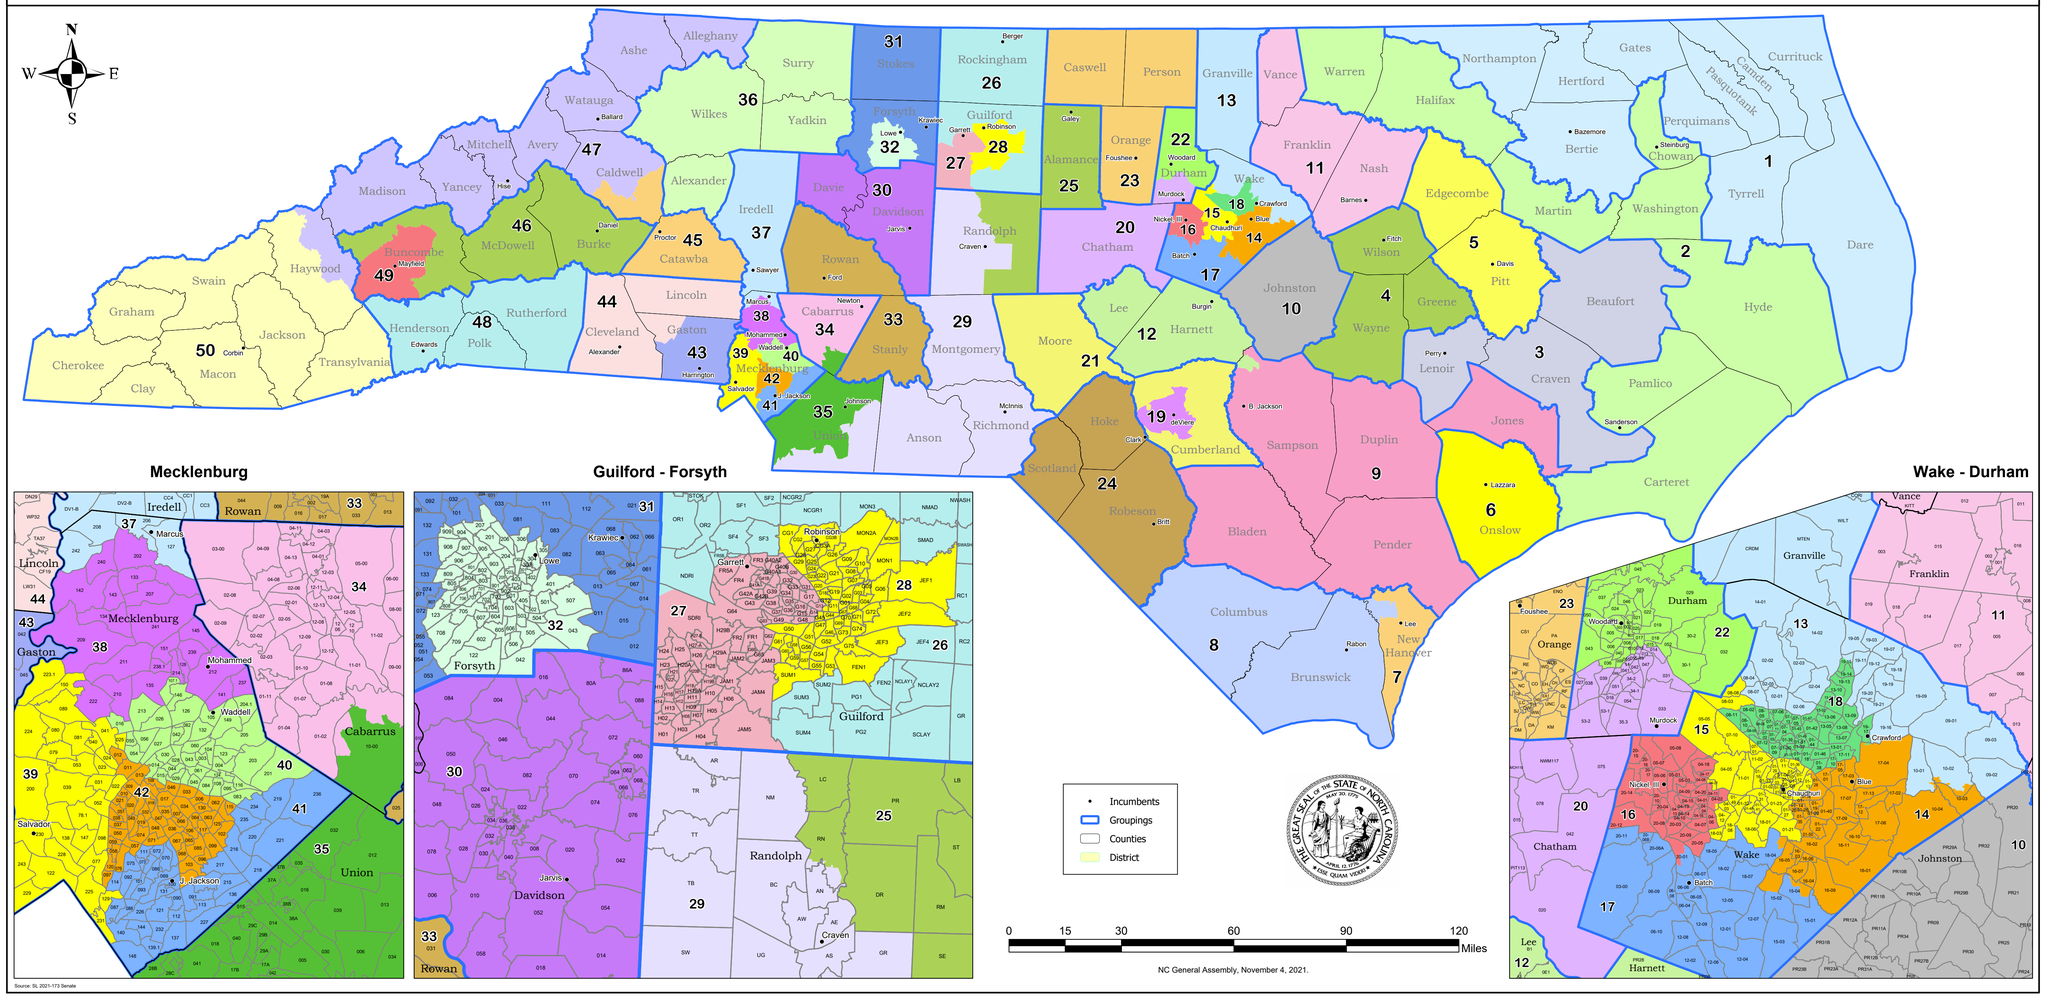
(b) The names and boundaries of voting tabulation districts and blocks specified in this section are as shown on the Census Redistricting Data P.L. 94-171 TIGER/Line Shapefiles associated with the most recent federal decennial census.

(c) If any voting tabulation district boundary is changed, that change shall not change the boundary of a Senate district, which shall remain the same as it is depicted by the Census Redistricting Data P.L. 94-171 TIGER/Line Shapefiles associated with the most recent federal decennial census."



SECTION 2. This act is effective when it becomes law and applies to elections held on or after January 1, 2022.

In the General Assembly read three times and ratified this the 4th day of November, 2021.

s/ Ralph Hise
Presiding Officer of the Senate

s/ Tim Moore
Speaker of the House of Representatives

Measures of Compactness Report

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.

NORTH CAROLINA GENERAL ASSEMBLY
AMENDMENT
Senate Bill 739

AMENDMENT NO. 6
(to be filled in by Principal Clerk)

S739-ATU-40 [v.1]

Page 1 of 1

Amends Title [NO]
First Edition

Date 11/2 ,2021

Senator Marcus

moves to amend the bill on page 7, lines 3-5, by rewriting the lines to read:
"**District 20**: Chatham County, Durham County: VTD 012, VTD 013, VTD 014, VTD 016, VTD 027, VTD 031, VTD 033, VTD 038, VTD 039, VTD 041, VTD 042, VTD 047, VTD 048, VTD 051, VTD 054, VTD 055-11, VTD 055-49, VTD 34-1, VTD 34-2, VTD 35.3, VTD 53-1, VTD 53-2.";

and on page 7, lines 10-15, by rewriting the lines to read:
"**District 22**: Durham County: VTD 001, VTD 002, VTD 003, VTD 004, VTD 005, VTD 006, VTD 007, VTD 008, VTD 009, VTD 010, VTD 015, VTD 017, VTD 018, VTD 019, VTD 020, VTD 021, VTD 022, VTD 023, VTD 024, VTD 025, VTD 026, VTD 028, VTD 029, VTD 032, VTD 036, VTD 037, VTD 040, VTD 043, VTD 044, VTD 045, VTD 046, VTD 050, VTD 052, VTD 30-1, VTD 30-2.".

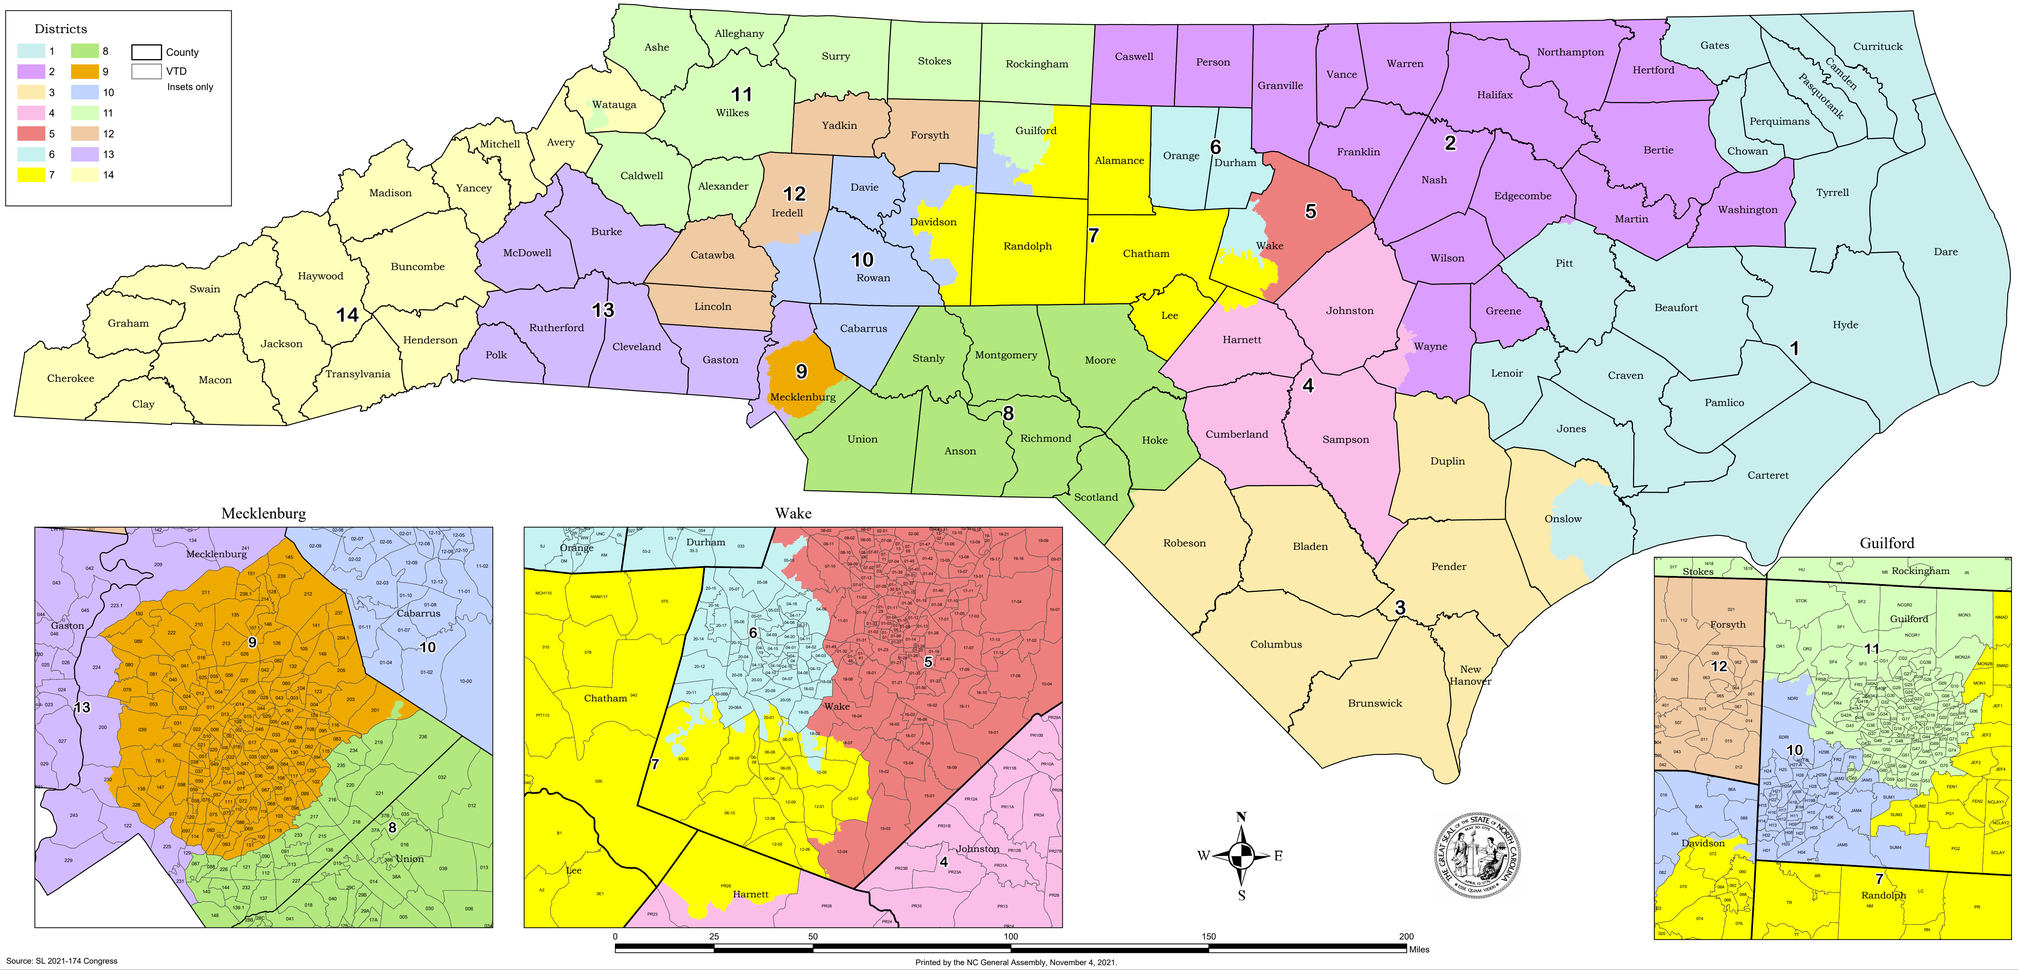
District 14: Avery County, Buncombe County, Cherokee County, Clay County, Graham County, Haywood County, Henderson County, Jackson County, Macon County, Madison County, Mitchell County, Swain County, Transylvania County, Watauga County: VTD 001, VTD 002, VTD 003, VTD 004, VTD 005, VTD 006, VTD 007, VTD 008, VTD 009, VTD 010, VTD 011, VTD 012, VTD 013, VTD 014, VTD 015, VTD 016, VTD 017, VTD 018, VTD 019: Block(s) 1899203001017, 1899203001018, 1899203001019, 1899203001020, 1899203001021, 1899203001033, 1899203001040, 1899209005002, 1899209005004, 1899209005005, 1899209005006, 1899209005018; VTD 020; Yancey County.

(b) The names and boundaries of voting tabulation districts and blocks specified in this section are as shown on the Census Redistricting Data P.L. 94-171 TIGER/Line Shapefiles associated with the most recent federal decennial census.

(c) If any voting tabulation district boundary is changed, that change shall not change the boundary of a congressional district, which shall remain the same as it is depicted by the Census Redistricting Data P.L. 94-171 TIGER/Line Shapefiles associated with the most recent federal decennial census."



SECTION 2. This act is effective when it becomes law and applies to elections held on or after January 1, 2022.

In the General Assembly read three times and ratified this the 4th day of November, 2021.

s/ Ralph Hise
Presiding Officer of the Senate

s/ Tim Moore
Speaker of the House of Representatives

Measures of Compactness Report

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.

Joint Meeting of Committees

August 12, 2021

House Committee on Redistricting
Senate Committee on Redistricting and Elections

Criteria Adopted by the Committees

- **Equal Population.** The Committees will use the 2020 federal decennial census data as the sole basis of population for the establishment of districts in the 2021 Congressional, House, and Senate plans. The number of persons in each legislative district shall be within plus or minus 5% of the ideal district population, as determined under the most recent federal decennial census. The number of persons in each congressional district shall be as nearly as equal as practicable, as determined under the most recent federal decennial census.

- **Contiguity.** No point contiguity shall be permitted in any 2021 Congressional, House, and Senate plan. Congressional, House, and Senate districts shall be compromised of contiguous territory. Contiguity by water is sufficient.

- **Counties, Groupings, and Traversals.** The Committees shall draw legislative districts within county groupings as required by *Stephenson v. Bartlett*, 355 N.C. 354, 562 S.E.2d 377 (2002) (*Stephenson I*), *Stephenson v. Bartlett*, 357 N.C. 301, 582 S.E.2d 247 (2003) (*Stephenson II*), *Dickson v. Rucho*, 367 N.C. 542, 766 S.E.2d 238 (2014) (*Dickson I*) and *Dickson v. Rucho*, 368 N.C. 481, 781 S.E. 2d 460 (2015) (*Dickson II*). Within county groupings, county lines shall not be traversed except as authorized by *Stephenson I*, *Stephenson II*, *Dickson I*, and *Dickson II*.

  Division of counties in the 2021 Congressional plan shall only be made for reasons of equalizing population and consideration of double bunking. If a county is of sufficient population size to contain an entire congressional district within the county's boundaries, the Committees shall construct a district entirely within that county.

- **Racial Data.** Data identifying the race of individuals or voters *shall not* be used in the construction or consideration of districts in the 2021 Congressional, House, and Senate plans. The Committees will draw districts that comply with the Voting Rights Act.

- **VTDs.** Voting districts ("VTDs") should be split only when necessary.

- **Compactness.** The Committees shall make reasonable efforts to draw legislative districts in the 2021 Congressional, House and Senate plans that are compact. In doing so, the Committee may use as a guide the minimum Reock ("dispersion") and Polsby-Popper ("permiter") scores identified by Richard H. Pildes and Richard G. Neimi in *Expressive Harms, "Bizarre Districts," and Voting Rights: Evaluating Election-District Appearances After Shaw v. Reno*, 92 Mich. L. Rev. 483 (1993).

- **Municipal Boundaries.** The Committees may consider municipal boundaries when drawing districts in the 2021 Congressional, House, and Senate plans.

NCLCV v. Hall
21 CVS 15426
LDTX015

- **Election Data.** Partisan considerations and election results data *shall not* be used in the drawing of districts in the 2021 Congressional, House, and Senate plans.

- **Member Residence.** Member residence may be considered in the formation of legislative and congressional districts.

- **Community Consideration.** So long as a plan complies with the foregoing criteria, local knowledge of the character of communities and connections between communities may be considered in the formation of legislative and congressional districts.

District plan definition file: 'HB 1020 H Red Comm CSBK-25.asc', modified 09/13/2019 10:31:10 AM

Municipalities derive from the Census Bureau's 2010 Redistricting Data (P.L. 94-171) Shapefiles. Population figures are based on the associated Summary File.

Note that for the purposes of this report, portions of municipalities in different counties are treated separately.

Populations values derive from the 2010 Census Redistricting Data (Public Law 94-171) Summary File. Election results were provided by the NC State Board of Elections. Votes that could not be associated with a specific precinct were excluded. Reported statewide totals may therefore be marginally lower than official contest results.

District plan definition file: 'House 18 USSupCt.asc', modified 02/14/2018 12:50:03 PM

Data Source: North Carolina State Board of Elections. Voter registration snapshot as of November 12, 2016. Note that voter records that could not be associated with a geographic location were excluded.

Printed 02/15/2018 {rptS04|dc2016GE|re2.1}

D = Democratic, R = Republican, L = Libertarian, NA = Native American. In this chart, the 'Other' race categories also include multi-race voters and those voters for whom a race indicator was not present in the source data.

House 18 USSupCt: Voter Registration by Party and Race

		Registration by Party															Registration by Race Without Regard to Party

District plan definition file: 'House 18 USSupCt.asc', modified 02/14/2018 12:50:03 PM

Data Source: North Carolina State Board of Elections. Voter registration snapshot as of November 12, 2016. Note that voter records that could not be associated with a geographic location were excluded.

D = Democratic, R = Republican, L = Libertarian, NA = Native American. In this chart, the 'Other' race categories also include multi-race voters and those voters for whom a race indicator was not present in the source data.

House 18 USSupCt: Voter Registration by Party and Race

		Registration by Party															Registration by Race Without Regard to Party

District plan definition file: 'House 18 USSupCt.asc', modified 02/14/2018 12:50:03 PM

Data Source: North Carolina State Board of Elections. Voter registration snapshot as of November 12, 2016. Note that voter records that could not be associated with a geographic location were excluded.

Printed 02/15/2018 {rptS04|dc2016GE|re2.1}

D = Democratic, R = Republican, L = Libertarian, NA = Native American. In this chart, the 'Other' race categories also include multi-race voters and those voters for whom a race indicator was not present in the source data.

House 18 USSupCt: Voter Registration by Gender, Age, and Ethnicity

Populations values derive from the 2010 Census Redistricting Data (Public Law 94-171) Summary File. Election results were provided by the NC State Board of Elections. Votes that could not be associated with a specific precinct were excluded. Reported statewide totals may therefore be marginally lower than official contest results.

House 18 USSupCt: Population 2010, US Senate 2010, President 2012

	2010 Census		US Senate 2010: Marshall-Burr-Beitler								US President 2012: Obama-Romney-Johnson

Populations values derive from the 2010 Census Redistricting Data (Public Law 94-171) Summary File. Election results were provided by the NC State Board of Elections. Votes that could not be associated with a specific precinct were excluded. Reported statewide totals may therefore be marginally lower than official contest results.

2017 HOUSE AND SENATE PLANS CRITERIA

Equal Population. The Committees shall use the 2010 federal decennial census data as the sole basis of population for drawing legislative districts in the 2017 House and Senate plans. The number of persons in each legislative district shall comply with the +/- 5 percent population deviation standard established by *Stephenson v. Bartlett*, 355 N.C. 354, 562 S.E. 2d 377 (2002).

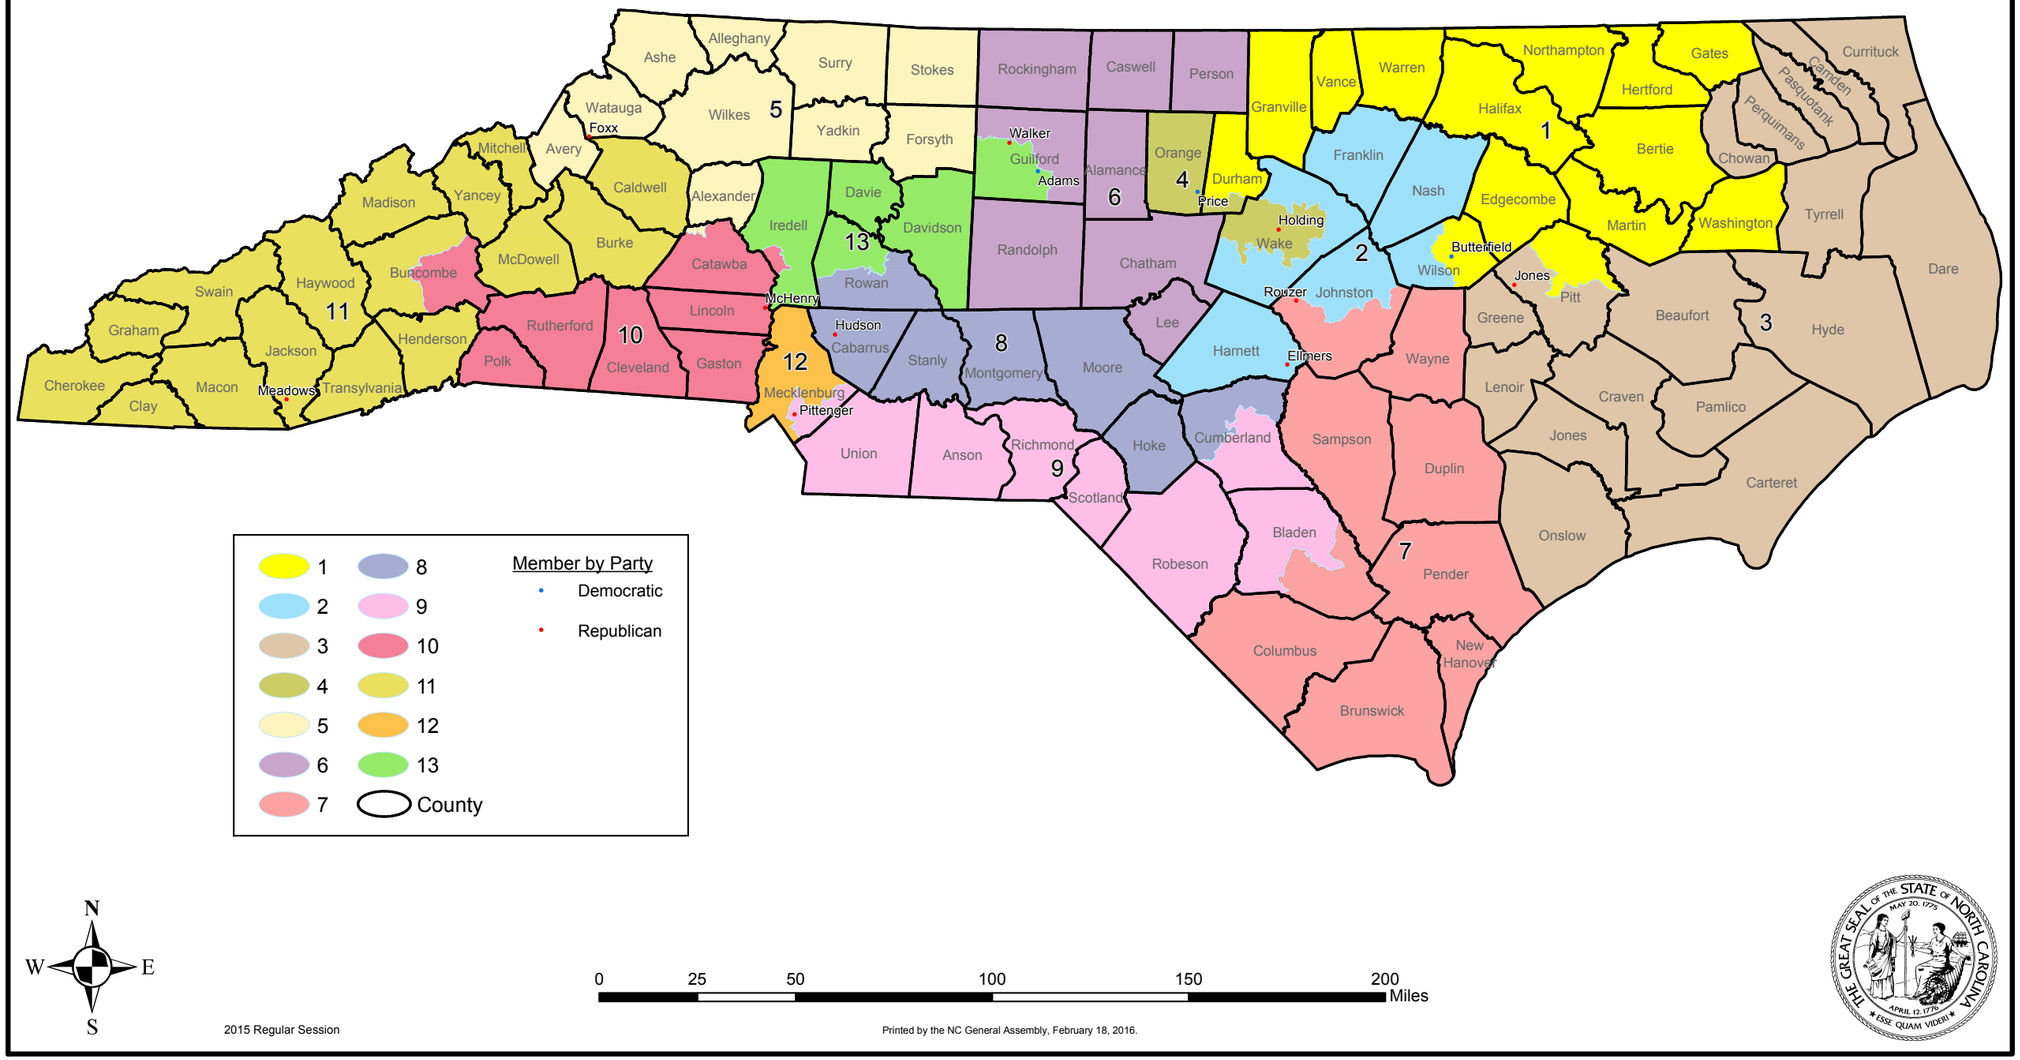
Contiguity. Legislative districts shall be comprised of contiguous territory. Contiguity by water is sufficient.

County Groupings and Traversals. The Committees shall draw legislative districts within county groupings as required by *Stephenson v. Bartlett*, 355 N.C. 354, 562 S.E. 2d 377 (2002) (*Stephenson I*), *Stephenson v. Bartlett*, 357 N.C. 301, 582 S.E.2d 247 (2003) (*Stephenson II*), *Dickson v. Rucho*, 367 N.C. 542, 766 S.E.2d 238 (2014) (*Dickson I*) and *Dickson v. Rucho*, 368 N.C. 481, 781 S.E.2d 460 (2015) (*Dickson II*). Within county groupings, county lines shall not be traversed except as authorized by *Stephenson I*, *Stephenson II*, *Dickson I*, and *Dickson II*.

Compactness. The Committees shall make reasonable efforts to draw legislative districts in the 2017 House and Senate plans that improve the compactness of the current districts. In doing so, the Committees may use as a guide the minimum Reock ("dispersion") and Polsby-Popper ("perimeter") scores identified by Richard H. Pildes and Richard G. Neimi in *Expressive Harms, "Bizarre Districts," and Voting Rights: Evaluating Election-District Appearances After Shaw v. Reno*, 92 Mich. L. Rev. 483 (1993).

Fewer Split Precincts. The Committees shall make reasonable efforts to draw legislative districts in the 2017 House and Senate plans that split fewer precincts than the current legislative redistricting plans.

Municipal Boundaries. The Committees may consider municipal boundaries when drawing legislative districts in the 2017 House and Senate plans.



Incumbency Protection. Reasonable efforts and political considerations may be used to avoid pairing incumbent members of the House or Senate with another incumbent in legislative districts drawn in the 2017 House and Senate plans. The Committees may make reasonable efforts to ensure voters have a reasonable opportunity to elect non-paired incumbents of either party to a district in the 2017 House and Senate plans.

Election Data. Political considerations and election results data may be used in the drawing of legislative districts in the 2017 House and Senate plans.

No Consideration of Racial Data. Data identifying the race of individuals or voters shall not be used in the drawing of legislative districts in the 2017 House and Senate plans.

2016 Contingent Congressional Plan Committee Adopted Criteria

Equal Population

The Committee will use the 2010 federal decennial census data as the sole basis of population for the establishment of districts in the 2016 Contingent Congressional Plan. The number of persons in each congressional district shall be as nearly as equal as practicable, as determined under the most recent federal decennial census.

Contiguity

Congressional districts shall be comprised of contiguous territory. Contiguity by water is sufficient.

Political data

The only data other than population data to be used to construct congressional districts shall be election results in statewide contests since January 1, 2008, not including the last two presidential contests. Data identifying the race of individuals or voters shall not be used in the construction or consideration of districts in the 2016 Contingent Congressional Plan. Voting districts ("VTDs") should be split only when necessary to comply with the zero deviation population requirements set forth above in order to ensure the integrity of political data.

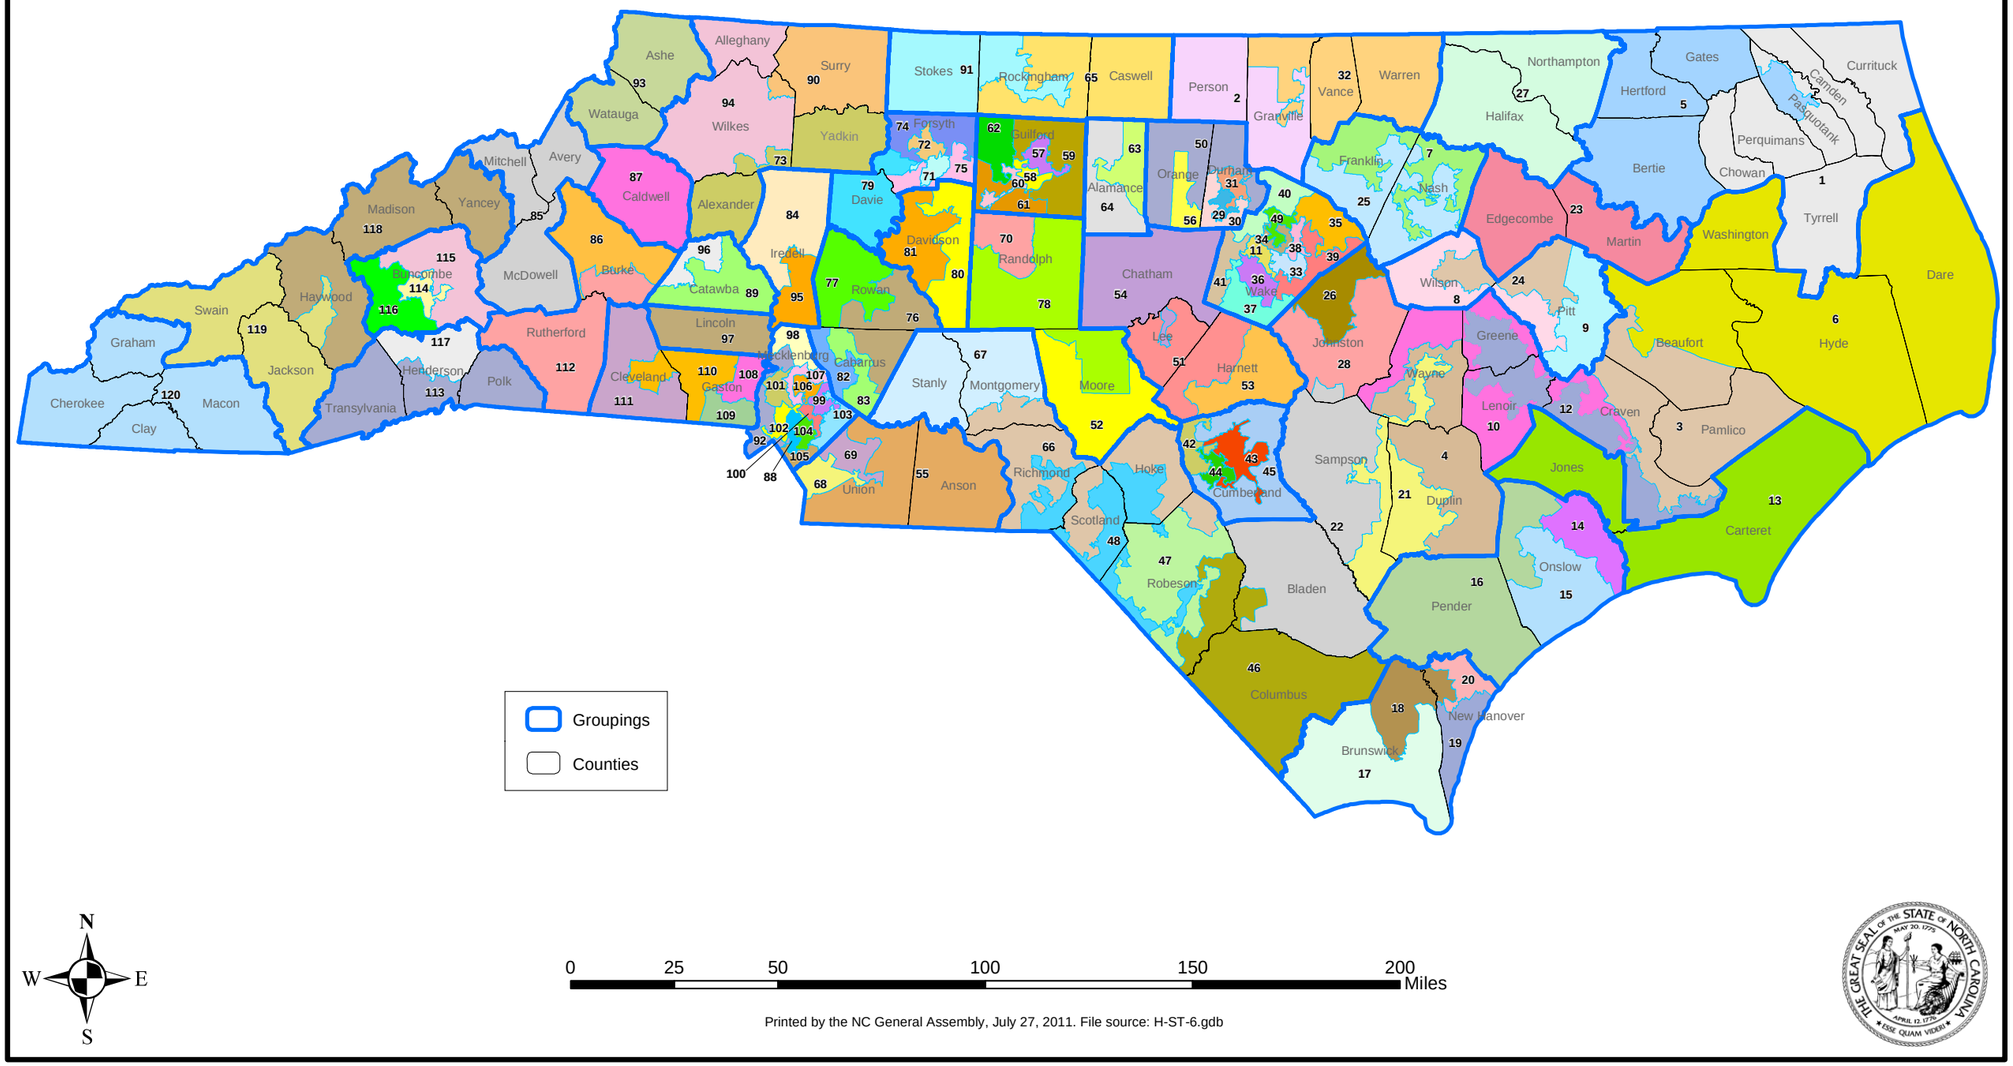
Partisan Advantage

The partisan makeup of the congressional delegation under the enacted plan is 10 Republicans and 3 Democrats. The Committee shall make reasonable efforts to construct districts in the 2016 Contingent Congressional Plan to maintain the current partisan makeup of North Carolina's congressional delegation.

Twelfth District

The current General Assembly inherited the configuration of the Twelfth District from past General Assemblies. This configuration was retained because the district had already been heavily litigated over the past two decades and ultimately approved by the courts. The Harris court has criticized the shape of the Twelfth

District citing its "serpentine" nature. In light of this, the Committee shall construct districts in the 2016 Contingent Congressional Plan that eliminate the current configuration of the Twelfth District.



Compactness

In light of the Harris court's criticism of the compactness of the First and Twelfth Districts, the Committee shall make reasonable efforts to construct districts in the 2016 Contingent Congressional Plan that improve the compactness of the current districts and keep more counties and VTDs whole as compared to the current enacted plan. Division of counties shall only be made for reasons of equalizing population, consideration of incumbency and political impact. Reasonable efforts shall be made not to divide a county into more than two districts.

Incumbency

Candidates for Congress are not required by law to reside in a district they seek to represent. However, reasonable efforts shall be made to ensure that incumbent members of Congress are not paired with another incumbent in one of the new districts constructed in the 2016 Contingent Congressional Plan.
